14)∟	Acknowledgement is made of a claim for domestic					
	The translation of the foreign language provisiona					
15) 🗀	Acknowledgement is made of a claim for domestic	priority under 3	o U.S.C	2. 33 120 and/or 121.		
Attachm 1) V No	ent(s) tice of References Cited (PTO-892)	4) Interview Sumr	nary (PTO	-413) Paper No(s)		
\sim	tice of Draftsperson's Patent Drawing Review (PTO-948)			Application (PTO-152)		
_	ormation Disclosure Statement(s) (PTO-1449) Paper No(s).	6) Other:				

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3, 4, 6, 7, 9, 10, 12, 13, 18, 19, and 21 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bradley, et. al.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2, 8, 11, 14 17, 20, 24 26, and 29 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bradley, et. al.

To have employed a paint layer or flexible sheet adhered by bonding or elongated strip in place of the resin layer in the construction of the device of Bradley, et. al. would have been obvious to one of ordinary skill in the art, motivated by the intended use. The choice of color/colors and hue would have been obvious to one of ordinary skill in the art, motivated by the intended use. The vessel shape and the background material perimeter shape would have been obvious matters of engineering design choice, producing no new and unobvious results.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bradley, et. al. as applied to claims 1, 3, 4, 6, 7, 9, 10, 12, 13, 18, 19, and 21 - 23 above, and further in view of Karabedian.

It would have been obvious to one of ordinary skill in the art to have employed a protective layer in the construction of the device of Bradley, et. al. in view of the teachings of Karabedian,

6. The references to Collette, et. al., Koeniger, and Kimura have been cited to further show related structure.
